

# **Linear Algebra!**

Forest Kobayashi

December 2017

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	What is Linear Algebra? . . . . .	1
1.2	How to Read this Document . . . . .	1
<b>2</b>	<b>Euclidean Vectors &amp; Scalars</b>	<b>2</b>
2.1	Some Terms . . . . .	2
2.2	Vector Arithmetic . . . . .	2
2.2.1	Vector Addition . . . . .	2
2.2.2	Vector Multiplication . . . . .	2
2.3	Bases and Linear Combinations . . . . .	2
<b>3</b>	<b>Matrices</b>	<b>3</b>
3.1	Matrices as a Change of Basis . . . . .	3
3.2	Matrix Arithmetic . . . . .	3
3.2.1	Scalars and Matrices . . . . .	3
3.2.2	Vectors and Matrices . . . . .	3
3.2.3	Matrices and Matrices . . . . .	3
3.3	The Determinant . . . . .	3
3.4	Eigenvectors and Eigenvalues . . . . .	3
<b>4</b>	<b>Abstract Vector Spaces</b>	<b>4</b>
4.1	Fields . . . . .	4

# Chapter 1

## Introduction

1.1 What is Linear Algebra?

1.2 How to Read this Document

## Chapter 2

# Euclidean Vectors & Scalars

### 2.1 Some Terms

### 2.2 Vector Arithmetic

#### 2.2.1 Vector Addition

#### 2.2.2 Vector Multiplication

The Dot Product

The Cross Product

### 2.3 Bases and Linear Combinations

# Chapter 3

## Matrices

### 3.1 Matrices as a Change of Basis

### 3.2 Matrix Arithmetic

#### 3.2.1 Scalars and Matrices

#### 3.2.2 Vectors and Matrices

#### 3.2.3 Matrices and Matrices

### 3.3 The Determinant

### 3.4 Eigenvectors and Eigenvalues

## Chapter 4

# Abstract Vector Spaces

### 4.1 Fields
